EDUCATION

2025 - 2027
RTU MIREA

- Master of Software Engineering

2021 - 2025
RTU MIREA

- Bachelor of Software Engineering
- Additional Professional Diploma IT Managemen

SKILLS

- JS, HTML, CSS
- Angular
- Go, Java
- PostgreSQL
- Docker, Kubernetes
- Critical Thinking

LANGUAGES

- Russian (Native)
- English (Intermediate)

INTERESTS

- AI
- Blockchain

PROFILE

Fullstack developer with nearly four years of professional experience building and maintaining scalable web applications. I specialize in developing end-to-end solutions using Angular on the frontend and Go on the backend, with a strong focus on clean architecture, performance, and reliability.
I have solid experience designing frontend architecture with Angular, as well as building efficient, high-performance backend services in Go, including RESTful APIs and concurrent systems. I pay close attention to application performance, scalability, and maintainability across the entire stack.
In my current role, I focus on developing new features, improving existing functionality, and contributing to overall system architecture.

WORK EXPERIENCE

Potential 2024 - PRESENT
Fullstack developer

- Developed and maintained scalable web applications using Angular (frontend) and Go (backend)
- Designed and implemented RESTful APIs and microservices with a focus on performance and reliability
- Built responsive, user-friendly interfaces with Angular, following best practices and modern architecture patterns
- Optimized application performance on both frontend and backend, reducing load times and improving efficiency
- Implemented concurrent and high-performance backend solutions using Go routines and channels
- Collaborated with cross-functional teams to define, design, and deliver new features

Desfee Studio 2021- 2024
Frontend developer

- Developed and maintained dynamic user interfaces using modern JavaScript frameworks
- Built reusable UI components and improved frontend architecture for better scalability
- Collaborated with backend developers to integrate APIs and ensure seamless data flow
- Optimized frontend performance, improving page load speed and user experience
